CONFERENCES AT MOTORWERK BERLIN
For conferences with breakout sessions, Motorwerk offers ideal conditions. Plenum and catering areas are usually placed on the ground floor of the hall. Breakout sessions and individual seminars can take place simultaneously on the gallery (1,000 sqm) and in the front building in a separated area with additional 200 sqm. Numerous companies have successfully implemented this concept as „open-space“.

An acoustic separation can be achieved either by mobile walls or via the use of a personal guidance system with headphones and microphones. Alternatively, small box systems can also be used, which means that due to the generous spatial distribution no acoustic problems arise during the parallel sessions.
